Guardian Agate Sans

Guardian Agate Sans looks awkward and strange at 18 point, as you can see here. That's because this family was carefully designed to compensate for the worst imaginable printing conditions: 6 point and below on newsprint. The optical compensations required for maximum legibility under such difficult circumstances inevitably look strange at large sizes.

FEATURES

GRADED WEIGHTS DUPLEXED ITALICS DUPLEXED WEIGHTS TABULAR LINING FIGURES FRACTIONS SUPERSCRIPT/SUBSCRIPT Stylistically and structurally, Guardian Agate Sans is very much a part of the Guardian Collection, but it differs in the specifics: A far narrower overall proportion packs a lot of information into a very small space. Short ascenders and descenders allow for tight, even solid leading without any compromise in redability. Inktraps ensure that the structures stand up well even at 4pt on newsprint, carving out space where ink will fill in and extra clarity is needed. Some letters do end up looking admittedly odd at large sizes, such as the dropped bars on the *f* and *t*, but these compensations ensure that the characters remain recognizable no matter what.

Graded weights

The Guardian Agate Sans family features four subtly different weights, or *grades*, allowing users to find the perfect weight for a particular situation, from **Grade 1**, the lightest, to **Grade 4**, the heaviest. The Medium weight can be used for reversing text out of a dark background, or for subheads and cases where an additional level of hierarchy is required. Tabular figures

The tabular figures in all weights and styles ensure that the numbers in all weights can be freely mixed in tables of figures no matter which version is used.

Small capitals

While agate typography generally doesn't need typographical niceties such as ligatures, all styles include small caps, which are very useful for adding an extra layer of hierarchy to maps, tables and infographics.

Duplexed weights

Duplexing takes the tabular figures to the next level, with all characters drawn on the same set of widths, so text can be switched on the fly from Regular to Bold without any reflow, perfect for stock listings and classified ads, where there is no room to maneuver at all. In addition, the italics are duplexed with their matching romans in all styles, and the Regular in all grades is duplexed with the Medium weight.

Duplexed Fractions

The Duplex versions feature tabular fractions, drawn on the same widths as the numerals.

SEHEN WIR das Gesamtbild unseres heutigen Lebens nur mit unseren Augen an, so können wir die Folgerung ziehen, daß dieses Gebilde einen chaotischen Chrakter trägt, und es kann uns nicht wundern, daß diejenigen, welche sich in diesem scheinbaren Chaos unwohl fühlen, der Welt entfliehen oder sich in geistigen Abstraktionen verlieren wollen. Doch jedenfalls muß es uns klar sein, daß diese Flucht vor der Wirklichkeit ein ebenso größer Irtrum ist wie jene Anlehnung an den reinsten Materialismus. Weder die Flucht in das Mittelalter, noch der von verschiedenen Kunsthistorikern empfohlene Wiederaufbau des Olympos kann und die Lösung bringen. ABOUT THE DESIGNERS

Paul Barnes (born 1970) is a graphic designer specializing in the fields of lettering, typography, type design and publication design. In the early 1990s he worked for Roger Black in New York where he was involved in redesigns of Newsweek, US and British Esquire and Foreign Affairs. During this time he art directed Esquire Gentleman and U&lc. He later returned to America to be art director of the music magazine Spin. Since 1995 he has lived and worked in London. He has formed a long term collaboration with Peter Saville, which has resulted in such diverse work as identities for Givenchy, 'Original Modern' for Manchester and numerous music based projects, such as Gay Dad, New Order, Joy Division and Electronic. Independently he has created identities for luxury Italian shoe manufacturer, Gianvito Rossi and German publisher, Schirmer Graf. Barnes has also been an advisor and consultant on numerous publications, notably The Sunday Times Magazine, The Guardian and The Observer Newspapers, GO, Wallpaper*. Harper's Bazaar and frieze. He has designed many books for publishers all over Europe including, Schirmer Mosel, Oxford University Press, the Tate and the iconic Schirmer Graf series.

Christian Schwartz (born 1977) is a partner, along with Paul Barnes, in Commercial Type, a foundry based in New York and London. A graduate of Carnegie Mellon University, Schwartz worked at MetaDesign Berlin and Font Bureau prior to spending several years working on his own before forming Schwartzco Inc. in 2006 and Commercial Type in 2008. Schwartz has published fonts with many respected independent foundries, and has designed proprietary typefaces for corporations and publications worldwide. Schwartz's typefaces have been honored by the Smithsonian's Cooper Hewitt National Design Museum, the New York Type Director's Club, and the International Society of Typographic Designers, and his work with Barnes has been honored by D&AD.
