
Graphik Collection

Originally released in 2009, Graphik has quickly become a modern classic. Created to be a blank slate, Graphik is a “vanilla-flavored” typeface that is perfectly suited for whatever style of expression is needed. With a rational grid composed of nine weights in eight different widths, the Graphik Collection is created for maximum flexibility in communication.

Inspiration for Graphik came from designer Christian Schwartz’s enduring interest in the expressive possibilities found in ordinary sans serif typefaces. This stems from his early exposure to Modernist graphic design, particularly posters, from the mid-twentieth century. Now expanded with assistance from Croatian designer Hrvoje Živčić, the collection ranges from the warm and friendly regular width, to the legibility-bending XXXX Condensed, all the way to the expansive Wide. The purposeful, elegant plainness and wide range of widths allow the Graphik collection to move effortlessly between being a central design element or playing a supporting role in editorial design, corporate branding, video and broadcast design, websites, apps, and user interfaces.

SUPERSCRIPT/SUBSCRIPT

The inspiration for Graphik came from designer Christian Schwartz’s longstanding interest in the expressive possibilities found in plain typefaces. This stems from his early exposure to Modernist graphic design, particularly posters, from the mid-twentieth century. While many of these designs were dominated by the three iconic sans serifs from Europe: Helvetica, Univers, and Futura, Schwartz was drawn to the “B-list” of sans serifs, such as Plak, Folio, and Neuzeit Grotesk. Graphik is a typeface without the baggage of Univers and Helvetica that can be used in similar ways without only evoking Modernism. Graphik is a grotesk with humanity which is best expressed in the roundness of the uppercase **G** and circular points, such as the period and the dot on the **i**. These and other design details add warmth without calling attention to themselves.

THE SPANISH WAR, which began in 1739, and the French war which soon followed it occasioned further increase of the debt, which, on the 31st of December 1748, after it had been concluded by the **Treaty of Aix-la-Chapelle**, amounted to £78,293,313. The most profound peace of the seventeen years of continuance had taken no more than £8,328,354 from it. A war of less than nine years' continuance added £31,338,689 to it (Refer to James Postlethwaite's *History of the Public Revenue*). During the administration of Mr. Pelham, the interest of the public debt was reduced from 4% to 3%; or at least measures were taken for reducing it, from four to three per cent; **the sinking fund** was increased, and some part of the public debt was paid off. In 1755, before the breaking out of the late war, the funded debt of Great Britain amounted to £72,289,673. On the 5th of January 1763, at the conclusion of the peace, the funded debt amounted to £122,603,336. The unfunded debt has been stated at £13,927,589. But the expense occasioned by the war did not end with the conclusion of the peace, so that though, on the 5th of January 1764, the funded debt was increased (partly by a new loan, and partly by funding a part of the unfunded debt) to £129,586,782, there still remained (according to the very well informed author of *Considerations on the Trade and*

 GRAPHIK REGULAR, REGULAR ITALIC, SEMIBOLD, 10/13 PT

Every introduction to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical, or inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner’s “aesthetics from above & from below.”

Methodologies of Aesthetics

The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his “architectonic” of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of “clear,” logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics “von unten.” The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of “the plain man” in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or “Doctrine of Taste,” as he called it, was possible, while the various definers of beauty as “the union of the Real and the Ideal” “the expression of the Ideal to Sense,” have done no more than he. No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the gen-

Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics “von unten.”

The State of Criticism

The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of “the plain man” in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or “Doctrine of Taste,” as he called it, was possible, while the various definers of beauty as “the union of the Real and the Ideal” “the expression of the Ideal to Sense,” have done no more than he. No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the generations is summed up in the mild remark of Fechner, in his “Vorschule der Aesthetik,” to the effect that the philosophical path leaves one in conceptions that, by reason of their generality, *do not well fit* the particular cases. And so it was that empirical aesthetics arose, which does not seek to answer those plain questions as to the enjoyment of concrete beauty down to its simplest forms, to which philosophical aesthetics had been inadequate. But it is clear that neither has empirical aesthetics said the last word concerning beauty. Criticism is still in a chaotic state that would be impossible if aesthetic theory were firmly

Graphik Compact

Graphik Compact is all about efficiency in copy fitting, having been designed to be narrow and space-saving without looking condensed. Used for both headlines and text, it gives a comfortable reading experience coupled with economy of space without appearing overtly narrow or crammed on the page, screen, or sign.

With nine weights from Thin to Super, Graphik Compact can express ideas with attention-grabbing boldness or take on a more supportive role in a typographic palette. It feels perfectly at home in the world of branding, video and broadcast design, web design, apps, and user interfaces and is easily legible at small sizes on small screens. Due to its narrowness, Graphik Compact is likewise useful in wayfinding projects as it allows for larger letters in tighter spaces, improving readability for users.

THE SPANISH WAR, which began in 1739, and the French war which soon followed it occasioned further increase of the debt, which, on the 31st of December 1748, after it had been concluded by the **Treaty of Aix-la-Chapelle**, amounted to £78,293,313. The most profound peace of the seventeen years of continuance had taken no more than £8,328,354 from it. A war of less than nine years' continuance added £31,338,689 to it (Refer to James Postlethwaite's *History of the Public Revenue*). During the administration of Mr. Pelham, the interest of the public debt was reduced from 4% to 3%; or at least measures were taken for reducing it, from four to three per cent; **the sinking fund** was increased, and some part of the public debt was paid off. In 1755, before the breaking out of the late war, the funded debt of Great Britain amounted to £72,289,673. On the 5th of January 1763, at the conclusion of the peace, the funded debt amounted to £122,603,336. The unfunded debt has been stated at £13,927,589. But the expense occasioned by the war did not end with the conclusion of the peace, so that though, on the 5th of January 1764, the funded debt was increased (partly by a new loan, and partly by funding a part of the unfunded debt) to £129,586,782, there still remained (according to the very well informed author of *Considerations on the Trade and Finances of Great Britain*) an unfunded debt which was brought to account in that and the

Every introduction to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical, or inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner’s “aesthetics from above & from below.”

Methodologies of Aesthetics

The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his “architectonic” of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of “clear,” logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics “von unten.” The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of “the plain man” in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or “Doctrine of Taste,” as he called it, was possible, while the various definers of beauty as “the union of the Real and the Ideal” “the expression of the Ideal to Sense,” have done no more than he. No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the generations is summed up in the mild remark of Fechner, in his “Vorschule der Aesthetik,” to the effect that the philosophical path leaves one in conceptions that, by reason of their generality, *do not well fit* the particular cases. And so it was that empirical aesthetics arose, which does not seek to answer those plain questions as to the

The State of Criticism

The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of “the plain man” in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or “Doctrine of Taste,” as he called it, was possible, while the various definers of beauty as “the union of the Real and the Ideal” “the expression of the Ideal to Sense,” have done no more than he. No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the generations is summed up in the mild remark of Fechner, in his “Vorschule der Aesthetik,” to the effect that the philosophical path leaves one in conceptions that, by reason of their generality, *do not well fit* the particular cases. And so it was that empirical aesthetics arose, which does not seek to answer those plain questions as to the enjoyment of concrete beauty down to its simplest forms, to which philosophical aesthetics had been inadequate. But it is clear that neither has empirical aesthetics said the last word concerning beauty. Criticism is still in a chaotic state that would be impossible if aesthetic theory were firmly grounded. This situation appears to me to be due to the inherent inadequacy and inconclusiveness of empirical aesthetics when it stands alone; the grounds of this inadequacy I shall seek to establish in the following. Granting that the aim of every aesthetics is to determine the Nature of Beauty, and to explain our feelings about it, we

SUPERSCRIP/T/SUBSCRIPT

Perfectly suited for editorial use, Graphik Condensed was created for fitting headlines in tight spaces on screen or in print, but is also suitable for text with some additional tracking. In designing the condensed widths, Schwartz focused on keeping the warmth and friendliness of Graphik by retaining the curved upper and lower sections of the characters, while elongating the straight sides. These consistent curves help harmonize the system throughout the widths of Graphik as the characters become more condensed.

Graphik X Condensed is an effective tool for the constraints and demands of modern publishing both in print and online, and has been used by many worldwide publications for surprisingly different needs. Iconic men's magazine *Esquire* pushed Graphik X Condensed to the limit in big and bold openers where the type has been photocopied, stenciled, traced with a felt-tip marker, and even had 3-D letterforms set on fire, with Graphik handily surviving the abuse with its personality intact. In contrast, food and dining magazine *Bon Appétit* employed the lighter weights to bring style and sophistication to their layouts. In concert with the rest of the widths of Graphik, X Condensed becomes a typeface that works for practically everything.

SUPERSCRIPT/SUBSCRIPT

The dramatically condensed letterforms of Graphik XX Condensed grab attention while still maintaining their elegance in the thinner weights. The XX Condensed width can hold its own in combination with powerful imagery either in a magazine spread or online publication. At large sizes, it is suitable for general graphic design use including book covers, signage, and magazine layouts.

FRACTIONS (PREBUILT AND ARBITRARY)
SUPERSCRIP/T/SUBSCRIPT

In contrast to the typical style of straight-sided sans serifs, which traditionally maximize the black with closed terminals and small counterforms, Graphik's condensed widths feature open terminals that allow for breathing room in the white spaces within the characters. This results in an inviting openness in the text, rather than becoming a relentless series of verticals reminiscent of a barcode.

The most extreme condensed width of Graphik, XXXX Condensed is perfect for posters, album covers, and any other situation where text has the room to boldly push the boundaries of legibility. The idea for XXXX Condensed started when designer Christian Schwartz was working on what he thought would be the narrowest possible variant of Graphik when fellow designer Abi Huynh challenged him to try making it twice as narrow. This encouragement helped Schwartz create his most condensed typeface yet.

Graphik Wide

Extended sans serifs first appeared in the 19th century, when printers making lottery posters demanded endless novelty in letterforms, encouraging typefounders to explore the limits of width and weight. The 20th century saw wide sans serifs incorporated into systematic, grid-friendly grotesks. Graphik Wide draws on both of these traditions, further broadening the utility of the Graphik collection.

SUPERSCRIPIT/SUBSCRIPT

As a typeface family gets wider, the tops and bottoms of characters often flatten out and curves generally become more rectangular. This approach did not suit the distinctive roundness of Graphik, so effort was made to keep the roundness and friendliness of Graphik throughout the design. In the thinnest weights, Graphik Wide expresses itself in a surprisingly elegant and forthright manner, while the heaviest weights assertively demand the reader's attention. Graphik Wide is suited for posters, book covers, editorial design, and when set with an expansive enough measure, it can even be comfortable for text.

THE SPANISH WAR, which began in 1739, and the French war which soon followed it occasioned further increase of the debt, which, on the 31st of December 1748, after it had been concluded by the **Treaty of Aix-la-Chapelle**, amounted to £78,293,313. The most profound peace of the seventeen years of continuance had taken no more than £8,328,354 from it. A war of less than nine years' continuance added £31,338,689 to it (Refer to James Postlethwaite's *History of the Public Revenue*). During the administration of Mr. Pelham, the interest of the public debt was reduced from 4% to 3%; or at least measures were taken for reducing it, from four to three per cent; **the sinking fund** was increased, and some part of the public debt was paid off. In 1755, before the breaking out of the late war, the funded debt of Great Britain amounted to £72,289,673. On the 5th of January 1763, at the conclusion of the peace, the funded debt amounted to £122,603,336. The unfunded debt has been stated at £13,927,589. But the expense occasioned by the war did not end with the conclusion of the peace, so that though, on the 5th of January 1764, the funded debt was increased (partly by a new loan, and partly by funding a part of the unfunded debt) to

 GRAPHIK WIDE REGULAR, REGULAR ITALIC, SEMIBOLD, 10/13 PT

Every introduction to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical, or inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner’s “aesthetics from above & from below.”

Methodologies of Aesthetics

The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his “architectonic” of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of “clear,” logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics “von unten.” The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of “the plain man” in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or “Doctrine of Taste,” as he called it, was possible,

Every introduction to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical, or inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fehner’s “aesthetics from above & from below.” The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher,

Every introduction to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical, or inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner's "aesthetics from above & from below."

Methodologies of Aesthetics

The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his "architectonic" of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of "clear," logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics "von unten."

The State of Criticism

The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of "the plain man" in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or "Doctrine of Taste," as he called it, was possible, while the various definers of beauty as "the union of the Real and the Ideal" "the expression of the Ideal to Sense," have done no more than he. No one of these aesthetic systems, in spite of volumes of

ABOUT THE DESIGNER

Christian Schwartz (born 1977), is a type designer and typography consultant based in New York City and with Paul Barnes is a partner in Commercial Type. A graduate of the Communication Design program at Carnegie Mellon University, Schwartz first worked at MetaDesign Berlin, developing typefaces for Volkswagen and logos for a number of corporations. He then returned to the US and joined the design staff at The Font Bureau, Inc., working for a wide range of corporate and publication clients.

Schwartz set out on his own in 2001, first forming Orange Italic with product designer Dino Sanchez and Schwartzco Inc. in 2006. He has released fonts with Village, FontFont, House Industries, and digital type pioneers Emigre. Many of Schwartz's typefaces have been proprietary designs for publications, including the *The New York Times*, the US edition of *Esquire*, Roger Black's redesign of the *Houston Chronicle*, and the extensive Guardian Egyptian family, with Paul Barnes, for *The Guardian's* celebrated new look in 2005. Schwartz has also designed typefaces for corporations including Bosch and Deutsche Bahn, both with design luminary Erik Spiekermann, reinsurance giant Munich Re, with Kai Bernau and Susana Carvalho of Atelier Carvalho Bernau, and the Empire State Building, also with Barnes.

Schwartz was awarded the prestigious Prix Charles Peignot in 2007, given every four or five years to a designer under 35 who has made "an outstanding contribution to the field of type design" by the Association Typographique Internationale. As part of the redesign team for *The Guardian*, Schwartz and Barnes were shortlisted for the Designer of the Year prize by the Design Museum in London. The pair were named two of the 40 most influential designers under 40 by *Wallpaper** in 2006, and Schwartz was included in *Time* magazine's 2007 "Design 100". Also in 2007, Schwartz and Spiekermann received a gold medal from the German Design Council (Rat für Formgebung) for their Deutsche Bahn typeface system. Schwartz's typefaces have been honored by the Smithsonian's Cooper Hewitt National Design Museum, the New York Type Director's Club, and the International Society of Typographic Designers, and his work with Barnes has been honored by D&AD.
